

OUTREACH PROGRAM Basic Literacy and Awareness 1st September, 2023

The Basic Literacy Program of the CoE Gender Studies was inaugurated in the presence of Dr. A V Narasimha Rao, Dr. S Vijaya Lakshmi, Madam Shobha Rani.

The ICFAI Law School, Hyderabad, runs the Basic literacy and awareness program. The inaugural ceremony was on 1st September, 2023. This is an ongoing process and is held every week. Professors of ICFAI Law School have taken this initiative to help the workers of the university, to educate them and to show our gratitude for helping the students and the university.

This is a small step taken by The CoE Gender Studies for helping the workers to make our university a better place for learning, for everyone. Teaching workers through this basic literacy drive, in the university, is crucial because it equips them with essential skills for communication, comprehension, and critical thinking. Basic Literacy empowers workers to effectively navigate information, communicate ideas, solve problems, and adapt to new challenges, enhancing productivity and fostering lifelong learning. Firstly, It helps in educating their children and their family. Secondly, it helps in communicating with students easier as the university is diversified and not all workers know how to communicate in several languages and are learning how to write their names, basic words and learning a language other than their native language for better communication. This small step can make a lot of difference as communication makes things better and this way things can go in a very smooth manner without any conflict and this can help anywhere they travel and make them feel confident as they learn new things. To conclude, communication is key and what better way to help people communicate than to teach them the law of the land!
