

ISA_EVINFO / Door Solutions Presentation

Event Information

Event Name: Door Solutions, Product Features and Applications

Presenter: Mr. Anjani Kumar Goteti

Date: 26 September 2026 (Saturday)

Time: 4:00 PM to 5:00 PM

Event Duration: 1 hour

Mode: Online presentation

Participants: Online session participants

Presentation Overview

The online presentation for Shakti Hormann was held on 26 September 2026 from 4:00 PM to 5:00 PM, with Mr. Anjani Kumar Goteti as the presenter. It introduced door solutions, product features and applications, with a focus on fire doors and their role in building safety.

Presentation Highlights

1. Fire Door Assembly and Types

The presenter identified key parts of a fire door assembly, including the frame, vision glass, hardware and door leaf. The presentation also introduced steel fire doors, fire-rated rolling shutters and sliding fire doors.

2. Fire Safety and Compartmentation

The session explained how fire doors help limit the spread of fire and smoke between building areas. A floor-plan example illustrated compartmentation as part of a fire-safety strategy.

3. Applications and Guidance

Examples showed fire-door applications in staircases, exit pathways, utility areas, shafts, lift lobbies, exit corridors and refuge areas. The slides also referred to provisions in NBC Section 2.22.

The online session combined product diagrams, application examples and participant interaction.
