

ISA_EVINFO /ISArch Expert Led AI Workshop 2026 Event

Information

- **Event Name:** Expert-Led AI Workshop / AI Advantage for Future Architects – Samsung Back to School 2026
- **Event Duration:** 1 day
- **Date:** 31 August 2026
- **Conducted at:** ICFAI School of Architecture (ISArch)
- **Resource Person:** Ms. Vandita Kullarni
- **Participants:** Architecture students from all batches and faculty members
- **Mode:** Offline
- **Venue:** FST Auditorium

Workshop Overview

The workshop introduced architecture students and faculty members to practical AI applications in learning, content creation, programming and problem-solving. Ms. Vandita Kullarni used demonstrations and interactive exercises to explain effective AI use through clear instructions and human judgment. **Workshop Highlights**

1. Practical AI Applications and Creative Workflow

Demonstrations connected an idea, reference image and structured prompt to AI-generated video. Reviewing and refining the output helped participants understand how AI can support creative work.

2. Prompt Engineering

The Role–Task–Context–Format framework showed how clear instructions improve AI outputs. Visual prompt exercises helped students specify purpose, background and the required form of a response.

3. Responsible Use and Engineering Mindset

Participants were encouraged to specify requirements, generate, verify, debug and verify again. The session emphasized testing, security and ownership of the result, strengthening awareness of human responsibility when using AI.

• PROFESSIONAL DEVELOPMENT WORKSHOP •

EXPERT-LED AI WORKSHOP

Prompt smarter. Create faster.
Build future-ready AI skills.

RESOURCE PERSON

Ms. Vandita Kullarni

31 August 2026

2:30 PM Onwards

ICFAI School of
Architecture, Hyderabad

WHAT YOU'LL LEARN

01

Prompt Like a Pro

Master the
fundamentals of
effective AI
prompting.

02

Your Personal Study Buddy

Turn AI into a
reliable partner
for learning.

03

Create Smarter, Not Harder

Use AI to work
more efficiently,
not just faster.

04

Future-Ready Skills

Build practical
AI literacy for
tomorrow.
